

## Robert Hutchens

**President & Chief Executive Officer  
StemBioSys, Inc.**

Bob Hutchens is the President and CEO of StemBioSys, a life science tool company based in San Antonio, TX. StemBioSys has developed a patented technology that provides for superior results in a range of cell culture applications. The lead application is to enable advances in cardiac safety testing of drugs in preclinical development. The company also offers a range of cell and cell expansion tools for use by biopharma, government and academic labs globally.

Prior to StemBioSys, Bob was a Partner with Booz & Company for 10 years (now a member of the PWC network and known as Strategy&) in New York. Prior to that he was a Partner with A.T. Kearney also in New York.

During his nearly 25 years in management consulting, most of Bob's work was with clients in the Life Sciences industry. Bob's clients included a number of major pharmaceutical companies as well as a range of medical device and life science tool companies. While at Booz, Bob also worked with Centers for Disease Control (CDC) and their Vaccine For Children (VFC) program and the President's Emergency Program for Aids Relief (PEPFAR).

Bob has a Bachelor of Business Administration from the Ross School of Business at The University of Michigan with Distinction and a Master of Business Administration in Finance and Operations from the Wharton School at the University of Pennsylvania. Bob is member of the Ross Business School Advisory Board at the University of Michigan, and he is a member of the Board of Directors of BioMed SA, a not for profit group dedicated to furthering the biomedical industry in San Antonio. Bob and his wife Randi have two children – both of whom are currently in college.
